

You shouldn't need to  
install drivers to make  
your stuff work.

We know that it's a pain having to install drivers for every mouse or pendrive that you use with your computer.

Thanks to the power of Linux, most peripherals will work immediately with your system after connecting them for the first time. No driver install required.

openSUSE. Have a lot of fun!  
Get it for free at [opensuse.org](http://opensuse.org)
