

Addresses

Weekend Venue: FIT ČVUT, Thákurova 9
all co-hosted conferences that will be held on the weekend Oct. 20–21

Second Venue: Masarykova Kolej, Thákurova 1
oSC12 has two extra days, Oct. 22–23, and will be continued in this building

Welcome Party: Café Traverza, Technická 6/2710, across the street from Weekend Venue

Big Saturday Party: Klub Lávká, Novotného lávka 1 (next to the Charles Bridge)

Transportation

In order to get to the **Venues** and **Welcome party**:

The closest stops are tram stops *Lotyšská* (from east, tram 8 and 2) and *Thákurova* (from south, tram 20 and 26). The end-station of underground A (*Dejvická*) is also close by (cca 600 m away)

In order to get to the **Big Saturday Party**:

The closest tram stop is *Karlovy lázně* (trams 17 and 18). Subway stations *Malostranská* and *Staroměstská* are one-two tram stops away as well. You could also walk from *Malostranská* or *Staroměstská* as well in order to have a bit of sightseeing.

About conferences

openSUSE Conference: oSC12 brings together a wide variety of Open Source contributors to collaborate on one of the major Linux distribution projects. In four exciting days of workshops and social happenings we bring alive the openSUSE slogan “Have a lot of fun”.

LinuxDays: Komunitní počin nahrazující známou komerční konferenci LinuxExpo – již neexistující českou událost s dlouholetou tradicí. Akce je zaměřená převážně na česky a slovensky mluvící komunitu kolem svobodného softwaru a nabídne především jednodušší a praktické přednášky.

Gentoo Miniconf: The first ever Gentoo Miniconf will bring together a number of core Gentoo developers to talk about and hack on the future of this geekiest-of-the-geekiest distribution and provide a place for (to-be) users to learn and get involved.

SUSE Labs: The annual get-together of members of SUSE Labs – the group in SUSE collaborating with the developer community of major open source projects, like the Linux Kernel, Samba, GNU Toolchain, or LibreOffice.

Future Media: About Digital Media in our lives. Bringing together experts, thought leaders and entrepreneurs, this track aims to push Open and Free into the Future. Featured topics will include digital lifestyle, social media, digital design, Creative Commons, knowledge sharing, Digital Freedom and more.

Saturday

	Kirk	McCoy	Scotty	Spock
9.00-10.00		Opening and Keynote: SME as target for GNU/Linux distributions		
10.00-10.30	Don't stand in the queue, let the queue stand in for you	Gamification - using game elements and tactics in a non-game context	Council and Trustees: Managing Gentoo	Pokud se to hýbe, zkompiluj to!
10.30-11.00	openQA - fully automated OS testing		gentoo@home	FreeIPA, SSSD
11.00-11.30	Google, grep, and usbmon: Reverse-engineering a USB scanner protocol	OpenRelief - Using Open Source Software and Open Hardware For Frontline Disaster Relief	Gentoo KDE: stable, fresh, and bleeding edge!	
11.30-12.00			Keeping Gentoo secure	Online translation using Weblate
12.00-12.30	lunch break	Extending the freedom to network infrastructures with the Bottom-up Broadband and the Commons	Benchmarking suite for Gentoo	Lowlevel Userspace Programming
12.30-13.00		If you can't open it, you don't own it	lunch break	
13.00-13.30	Wayland	lunch break		Cgroups usage
13.30-14.00			Using Catalyst to create a custom stage and ISO (part 1)	lunch break
14.00-14.30	ownCloud under the Hood	Defensive Publications: ensuring freedom of use in the Open Source Community		
14.30-15.00				Performance monitoring of modern X86 platforms using the CPUpower monitoring tool
15.00-15.30	LibreOffice - what's new	Extending the freedom to network infrastructures	Gentoo Prefix: The World beyond /	WrapSix - how to build it and how to run it
15.30-16.00		Wikidata - Wikimedia going structured data		
16.00-16.30	Attitude adjustment needed: Experiences from LibreOffice	What you don't understand will still control you	State of Gentoo Infrastructure	Proč používat PostgreSQL
16.30-17.00	porting to Android	Round Table: How do you DO 'open'?	Working on Gentoo's PR	Jak přispívat do Fedory
17.00-17.30	Crashing the kernel for fun and profit	Closing session		
17.30-18.00				

Monday

	Picard	Riker
10.00-10.30	A complete server to assist charities	Packaging Tool
10.30-11.00		Booth - Geo Clustering for SUSE Linux Enterprise High Availability Extension
11.00-11.30	Kernel development/maintenance in Taobao	megasas on steroids: qemu device-passthrough with VFIO
11.30-12.00		dev.pink revisited: structured kernel message logging and the SCSI mess
12.00-13.00	openSUSE release schedule NG	Make it Snappery - Remote Snapshots with Samba
13.00-15.00	lunch break	lunch break
15.00-16.00	openSUSE Maintenance - overview of technology and processes	The openSUSE Travel Support Program
16.00-17.00	Something is busted - Food for thought	Armbassadors 2.0
17.00-17.30	House cleaning is necessary - Package Maintainers Step up	Nonverbal communication at the booth
17.30-18.00		Whats new in openSUSE Connect

Sunday

	Kirk	McCoy	Scotty	Spock
11.00-11.30	Use the openSUSE buildservice for embedded projects	Launchpad	Gentoo @ isoHunt	openSUSE on SPARC
11.30-12.00	DevOps, Puppet & Chef	Unity on openSUSE	3D, games and everything about Graphic performance under Linux/Gentoo	openSUSE on Power
12.00-12.30	Zen and the art of Live Programming with Clojure	desktopeducation and server4education - a free client and server solution for education	SHA1 and OpenPGP/GnuPG lunch break	lunch break
12.30-13.00				
13.00-13.30	Teaching Free Software for everybody	lunch break		Announcement of the Openmobility summer contest results
13.30-14.00	lunch break		OpenPGP/GnuPG key signing party	openSUSE ARMs
14.00-14.30		Novinky v oblasti linuxových sítí		Nix(OS) purely functional package management
14.30-15.00	How software gets from the community to commercial enterprise		Using Catalyst to create a custom stage and ISO (part 2)	Why proper logging is important even in the bootstrapping phase of a software project?
15.00-15.30	Marble Virtual Globe - a Swiss Army Knife for Maps	Apocalypse Now - News from the Network Jungle	The Puppet Show	Scanny - Ruby on Rails Security Scanner
15.30-16.00	openSUSE Around the World	(Ne)bezpečnost internetové sítě	Gentoo testing, testing and automated testing	fdisk: a 21st century disk partitioning tool
16.00-16.30				
16.30-17.00	Watson: Winning Jeopardy with SUSE, Power and Hadoop	Co je nového v Debian Wheeze	Group photo	
17.00-17.15			Contributing to Gentoo: Getting involved more	POTS, FAX, ISDN in the era of voice over IP
17.15-17.45	Lightning talks	Nasazení Ubuntu v praxi		Prospective Printing Solutions
17.45-18.15		Budoucnost Slaxu	Closing session	
18.15-18.30				

Tuesday

	Picard	Riker
10.00-10.30		Introduction to openSUSE KDE maintenance model
10.30-11.30		Optimizing a boot time, aka 2 second boot systemd, dracut and openSUSE: where are we, what is missing, what do we plan for the future?
11.30-12.30		lunch break
12.30-13.45		Group photo
13.45-14.00		KIWI and SUSE Linux Enterprise Point of Service
14.00-15.00	OSCI13 The Spirit and the City	Speedy Geeko
15.00-16.00		Closing session
16.00-16.30		

Conferences & track

	openSUSE conference	LinuxDays	Gentoo miniconf	Future media
