For Users

With openSUSE you easily design graphics, create documents and videos or surf the Net. Hundreds of applications are included and thousands more up to date tools are a click away. It's a desktop ready for the most demanding user: anytime, anywhere, anyway.

For Administrators

openSUSE fulfills all your networking, management and maintenance needs for the home or small enterprise. Create a mail, Web or file server. Manage user accounts. Deploy virtual machines or a firewall. Thanks to YaST, the most comprehensive and powerful admin tool in the industry, you manage your environment with ease.

For Developers

With unparalleled stability, flexibility and up to date versions of all the relevant tool chains and libraries, there is no better Linux for software development.

openSUSE®

Linux for
Open Minds

Hello! We're the international openSUSE Community—friendly, welcoming and active in creating the premier Linux for the future.

What We Do

We develop an awesome Linux distribution and powerful tools around it. We believe in the freedom to create technology that will better ourselves and the world. And in having fun while doing it!

Working Together

We work extensively with the wider Free Software community and other Linux distributions, initiating new collaborative projects and embracing anyone who wants to build upon our technology.

Helping You Out

Whether you're a new user looking for help, or an experienced developer looking to cross-compile and distribute software, openSUSE provides the tools and support you need and gladly helps you on your way.
